Possible Fridge Placements	LHS and Under Machine

* Output is determined using a machine with constant water supply and is dependent on cup size, quality settings, spout, model and nominal power rating. The recommended maximum daily capacity is based on our catalogued service concept. However, these average values serve merely as a guideline. Let our trained WMF team match the ideal coffee machine design to your specific needs. ** Height including coffee bean hoppers. *** The A-rated sound pressure level LpA (slow) and LpA (impulse) at operating personnel work stations is under 70 dB(A) in any operating mode. Above 5° dKH (carbonate hardness), a WMF water filter must be fitted.

INTUITIVE MENU SYSTEM

The 7" colour touch display is easy to navigate using swiping and scrolling. The menus can be adjusted to meet your requirements, for example for self-service or served venues.

DRIP TRAY & CUP STOP

Protection against overflowing is provided by a fill level sensor, and a presence sensor locks the machine if the drip tray is missing. An adjustable cup stop ensures correct cup positioning.

UP TO 3 HOPPERS

To allow you to offer your customers an appealing choice of beverages, the WMF 1300 S comes with the option of up to two bean hoppers plus one powder hopper.

HEIGHT-ADJUSTABLE SPOUT

The beverage spout can be manually adjusted to the ideal height for the cup being used, so beverage temperature remains perfect and unsightly splashes of milk are eliminated.

ECO MODE

You can take advantage of the Eco Mode settings on the WMF 1300 S to reduce energy consumption during periods of light use.

CHOC MIXER

The Choc Mixer promises easy handling and maintenance thanks to a magnetic lock that guarantees correct insertion of the mixer bowl.

MANUAL INSERT OF FURTHER COFFEE

For greater flexibility, an additional coffee type such as decaffeinated coffee can be dispensed through the manual insert, offering the benefit of even more choice for your customers.

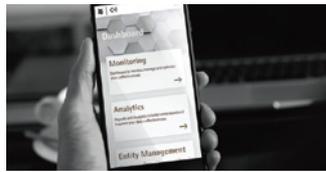

SMART MILK SYSTEM

The WMF 1300 S comes with the Smart Milk system, a pump driven system, making it easy to prepare classic coffees with hot milk and silky hot milk foam.

STEAM JET

The SteamJet warms every cup in a few seconds using the natural power of steam. So every beverage is not only served at the ideal temperature but also remains hot for longer.

WMF COFFEE CONNECT

Included as an option is WMF's innovative digital platform enables you to take advantage of digitalisation and the IoT to make your coffee business even more profitable.

CLEANING SYSTEM

Automatic cleaning is easily activated via the touch display, simplifying the maintenance process through intuitive animation and text.

SERVICE

WMF Australia have an Australia wide sales & service network with trained service engineers. WMF can provide forecasted service costs for all models.
