

# THE DC PRO

*A LIFETIME OF RESEARCH, EXPERIMENT AND DESIGN HAVE CULMINATED IN THE DALLA CORTE PRO. THE NEXT STAGE IN THE PURSUIT FOR THE PERFECT ESPRESSO.*

A multi-boiler machine with a patented direct temperature control system, the DC Pro allows the barista 100% control over every parameter involved in espresso preparation and the security of unparalleled temperature stability regardless of the operating conditions.

The Dc Pro is housed within a functional yet strikingly modern shell and created using the highest quality materials. The design of the system is smart and logical which allows for easy technical access and minimal downtime.

**SCAE WCE OFFICIAL MACHINE**

**WORLD LATTE ART CHAMPIONSHIP™**

**WORLD COFFEE IN GOOD SPIRITS CHAMPIONSHIP™**

# FEATURES

## TEMPERATURE STABILITY

- The DTCS Multi-boiler system gives the DC Pro a temperature stability of 0.1° Celcius.
- Through a patented boiler design and PID controlled element the system can hold this stability in super high volume periods with ease.
- Each group head can have its temperature set independently.

## ENERGY EFFICIENCY

- The DC Pro is up to **47% more energy efficient** than a E61 system. Through its multi-boiler system energy is only used as is precisely needed. Brewing units can be individually turned off when not needed.
- **Thermally Insulated** - No heat is lost at any point of the heating to extraction process.
- **Low Power Saver mode**: In standby the machine slowly lowers its boiler temp to 30%, which allows it to heat up with minimal power / time when back in use.

## CONTROL

- **Multi-functional LCD Panel** - Gives the Barista immediate control over the machine parameters for extraction.
- **Group temperatures** can be set completely independently.

## TECHNICAL

- **Simple Construction** - Machine can be accessed for service by removing only 4 screws.
- **Digital Alarms System** - Faults are digitally recorded by the machine so there is no guesswork by the technician.

## DESIGN

- **Variety of Finishes** - The DC Pro comes in 3 finishes - Aluminium, titanium and dynamic white - which feature premium metal particle bases.
- **Ergonomic Design** - Group is visible and low laying, Steam wands feature half-twist, and handle is shaped for ease in repetitive use.

## THE DC SYSTEM

- **Grind Control System (GCS)** - Can be integrated with up to 3 DC One units for automated stepless grind adjustment.
- **Milk Control System (MCS)** - Fully compatible with the MCS
- **Online Control System (OCS)** - DC Pro can be monitored from anywhere in the world.

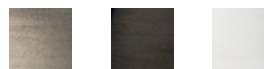

## SPECS

		2 GROUPS	3 GROUPS
DIMENSIONS (L X H X T)	(MM)	730X525X510	940X525X510
WEIGHT	(KG)	74	88
POWER CONSUMPTION (24H)	(KW)	7.9	11.3
CONNECTED LOAD		230V / 25AMP	230V / 32AMP
STEAM BOILER CAPACITY	(L)	7.5	13
GROUP BOILERS CAPACITY	(L)	0.5	0.5
SERIAL CONNECTION		RS 232/485	RS 232/485
